Introduction to Nochex

About Nochex

Nochex is a UK based, independently-owned provider of secure online payment solutions. Established in 1999, the company's payment system is now installed on thousands of websites and integrated into a significant number of software packages.

Nochex' account holders can accept e-money online payments without the need for an expensive internet merchant bank account or payment gateway. By replacing two costly services with an all-in-one e-Money account, backed up by friendly and responsive customer services, Nochex' customers can put all their efforts into building their online businesses.

The Nochex system allows account holders to accept the following credit and debit cards:

The Nochex system also allows account holders to pay using the following digital service:

Setting up Nochex as a Payment Option

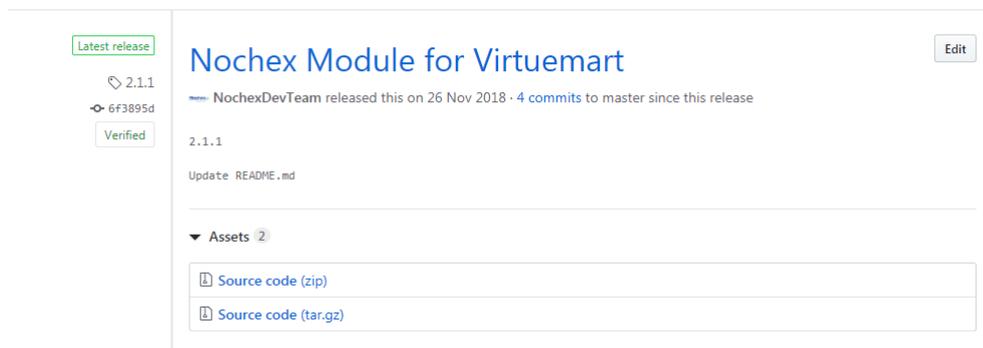

- With the Nochex payments module installed you can not only accept credit card payments but also Nochex members can pay using their Nochex account.
- Customers don't even need a Nochex account to make payments through Nochex making it quick and easy for customers to make payments.
- Nochex uses anti-fraud protection like 3D Secure – the leading “Internet Authentication Protocol” designed by Visa and MasterCard, to ensure your customers can make payments in confidence.
- Emails are sent directly from Nochex giving payment confirmation both to the customer and the seller.

The installation instructions below explain how to setup Nochex as a payment option in VirtueMart.

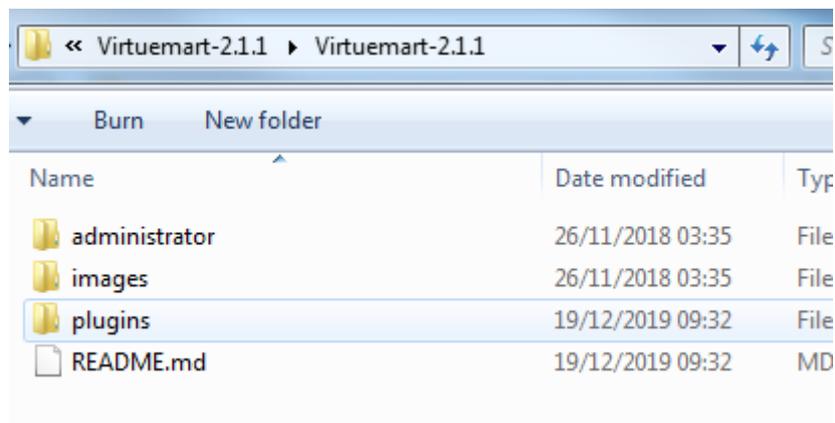

Nochex Installation Instructions

IMPORTANT - Customers are always recommended to back up their code before making any significant changes, such as the ones detailed in this document.

1. Firstly you must have Joomla and VirtueMart installed on your website!
2. Download the latest module files, which can be found [here](#).
 - a. Go to the Nochex GitHub, and click on the 'Source Code (zip)' link

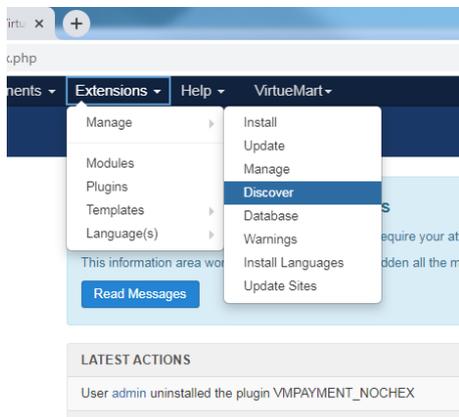

- b. This will download a copy of the Nochex module
 - c. Go to the downloaded module, and extract the module files;
3. Copy the extracted module files to the corresponding Joomla folders on your web server. You can use FTP for this process or a File Manager.

4. Login to your Joomla admin area

5. Go to Extensions > Management > Discover

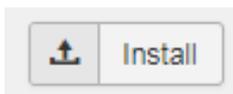

6. This will show your Nochex module

<input type="checkbox"/> Name	Location	Type	Version
<input type="checkbox"/> VMPAYMENT_NOCHEX	Site	Plugin	2.0.0

7. Click the checkbox next to VMPAYMENT_NOCHEX

8. Press the install button, to install the Nochex Module.

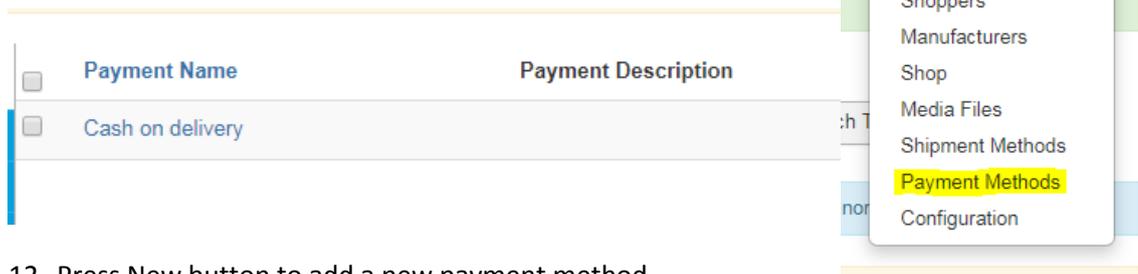

9. Once installed, a successful message will be shown

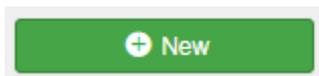

10. Next, Go to VirtueMart > Payment Methods

11. This will show your VirtueMart payment methods

12. Press New button to add a new payment method

13. This will load the following;

Payment Method Information Configuration

Payment Method

Payment Name

Sef Alias

Published No Yes

Payment Description

Payment Method

Shopper Group

List Order

Currency

14. Enter the following into each of the above fields

- Payment Name (Required) – Nochex
- Sef Alias (Required) – nochex
- Published (Required) – Yes
- Payment Description (Optional) – Can be left blank
- Payment Method (Required) – VMPAYMENT_NOCHEX

Logos at Checkout

Nochex Email Address

Test Mode No Yes

Hide Billing Details No Yes

Debug No Yes

Show Postage No Yes

Detailed Product Information No Yes

Order Status for Pending transactions

Order Status for Successful transactions

Order Status for Failed transactions

18. Complete all of the relevant settings;

- Logos at Checkout – Logos / Images you would like to display on the checkout page (Required)
- Nochex Email Address / Merchant ID – Your Nochex Merchant ID / Email address, for example: you@yourbusiness.com (Required)
- Test Mode – To check if everything is working. After you have found that everything is working, remember to put the status to Live Mode, otherwise no money can be accepted.
- Hide Billing Details – To hide billing details.
- Show Postage – Show Postage on your Nochex account
- Detailed Product Information – Display products in a structured and detailed format on your payment page
- Order Status for Pending transactions – Status for pending transactions (Required)
- Order Status for Successful transactions – Status for successful transactions (Required)
- Order Status for failed transactions – Status for failed transactions (Required)

19. Save all changes

20. Go through the checkout process to make sure the module has installed and setup correctly

Once you have gone through the entire process as a customer you will receive payment notifications, and an updated order will be visible in your VirtueMart along with payment information

Remember: Disable Test mode in your Nochex Module once you are ready to accept live transactions

Experiencing problems with your integration?

Please [open](#) a support ticket with details of your issues, the version of your VirtueMart plugin so we can help to resolve your integration problems.
