Introduction to Nochex

About Nochex

Nochex is a UK based, independently-owned provider of secure online payment solutions. Established in 1999, the company's payment system is now installed on thousands of websites and integrated into a significant number of software packages.

Nochex' account holders can accept e-money online payments without the need for an expensive internet merchant bank account or payment gateway. By replacing two costly services with an all-in-one e-Money account, backed up by friendly and responsive customer services, Nochex' customers can put all their efforts into building their online businesses.

The Nochex system allows account holders to accept the following credit and debit cards:

Setting up Nochex as a Payment Option

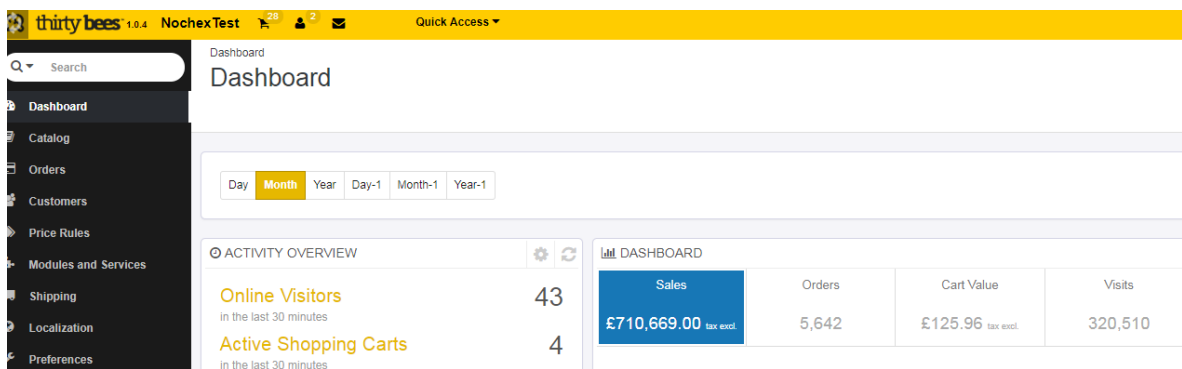

- With the Nochex payments module installed you can not only accept credit card payments but also Nochex members can pay using their Nochex account.
- Customers don't even need a Nochex account to make payments through Nochex making it quick and easy for customers to make payments.
- Nochex uses anti-fraud protection like 3D Secure – the leading “Internet Authentication Protocol” designed by Visa and MasterCard, to ensure your customers can make payments in confidence.
- Emails are sent directly from Nochex giving payment confirmation both to the customer and the seller.

The installation instructions below explain how to setup Nochex as a payment option in thirty bees.

Nochex Installation Instructions

IMPORTANT - Customers are always recommended to back up their code before making any significant changes, such as the ones detailed in this document.

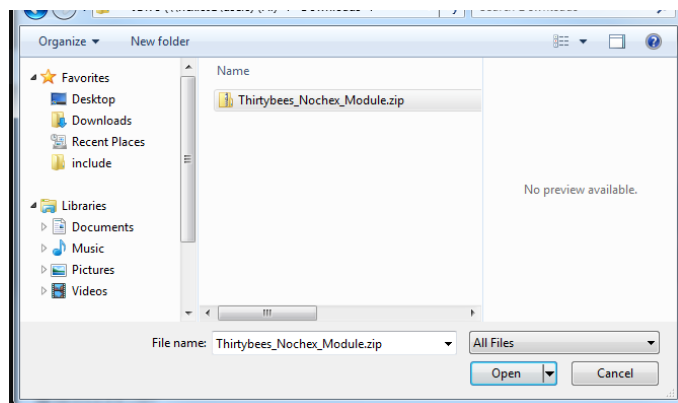

1. Firstly make sure you have downloaded the latest module files located [here](#)
2. Next, Login to your thirty bees admin page.

3. Select Modules and Services > Add a New Module

4. Once Add a New Module section shows, Press Choose a file, and locate your Nochex Gateway Plugin

5. Press Upload Module to add the module to your thirty bees store.

6. Press the Install button

7. Once installed, complete the necessary information fields:

(Required field) Nochex Merchant ID/ Email Address:
This is your Nochex Merchant ID email address e.g. test@test.com or a Nochex ID e.g. test_ID.

(Optional field) Test Mode: This is an option to test that the module/system works.

Note: Leave unselected if you want to make live transactions.

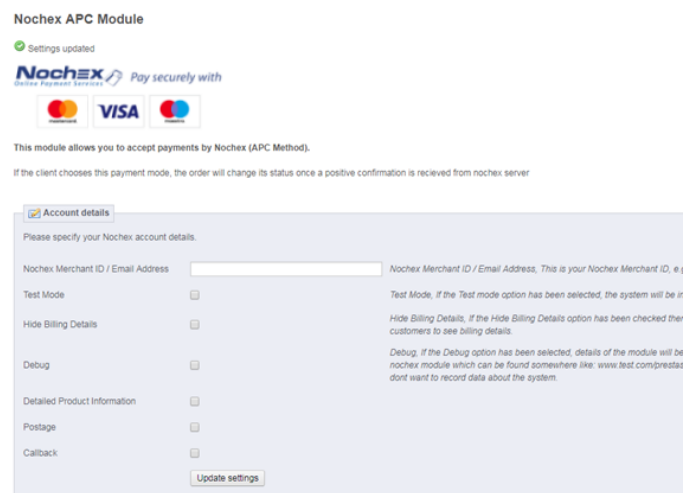

(Optional field) Hide Billing Details: This is an option if you choose to hide billing details.

(Optional field) Debug: This option allows the module to record information about the module and orders, which can help with detecting problems.

(Optional field) Detailed Product Information: Show a detailed product list to your Nochex payment page.

(Optional field) Postage: Display the postage amount separately from the total on your Nochex payment page.

(Optional field) Callback: if you enable this option please contact Nochex support so we can enable this on your account.

8. Once you have entered your details, press the update settings button.
9. Finally go to your shop and test to make sure the Nochex Payment Gateway has been setup correctly as well as orders showing correctly.

Debugging and Troubleshooting

“Why is my Nochex payment page not showing?”

Please check the details you have entered in Step 7 of the Installation instructions to make sure all correct, and you have entered your registered Nochex Merchant ID / Email address in the configuration form.

Still experiencing problems?

Please [open](#) a support ticket with details of your issues, the version of your thirty bees plugin so we can help to resolve your integration problems.
